(1) Ranked by Consumption 2012

(2) Tables 6.1 and 6.2 include wine consumption in 213 countries during the period 2009-2012. Consumption data for 58 countries in "UPPER CASE BOLD FONT". Countries included in this group are primarily wine producing countries where relatively reliable data is available from government sources. Where data for countries included in this group is not available or reliable, wine consumption data has been estimated by using the following formula: "Production plus imports minus exports equals consumption". There are 165 countries listed in Tables 6.1 and 6.2 in "lower case font". Wine consumption for these countries is not available. Consumption has been estimated by TDA by aggregating the **EXPORTS** of the major wine producing countries to each individual country. The aggregation includes 40 countries including the EU 27, Argentina, Australia, Canada, China, Chile, Hong Kong, New Zealand, Singapore, South Africa, South Korea, Ukraine, United States and Uruguay.

(3) "0.0%" indicates less than .1%.

(4) Does not include yellow wine consumption of 1,043 billion liters in 2009; 1,324 billion liters in 2010; 1,591 billion liters in 2011 and 1,914 billion liters in 2012.

(5) Does not include sake consumption of 684 million liters in 2009; 672 million liters in 2010; 663 million liters in 2011 and 654 million liters in 2012.

(6) Does not include domestic rice wine and fruit wine consumption of 897 billion liters in 2009; 884 million liters in 2011; 885,000 in 2011 and 887 million liters in 2012.

(7) See Appendix 5: "US Wine Consumption 2009-2012".

(8) Consumption includes significant quantities of domestically produced wine that is derived from fruits other than grapes.

(1) Listed alphabetically

(2) Tables 6.1 and 6.2 include wine consumption in 213 countries during the period 2009-2012. Consumption data for 58 countries in "UPPER CASE BOLD FONT". Countries included in this group are primarily wine producing countries where relatively reliable data is available from government sources. Where data for countries included in this group is not available or reliable, wine consumption data has been estimated by using the following formula: "Production plus imports minus exports equals consumption". There are 165 countries listed in Tables 6.1 and 6.2 in "lower case font". Wine consumption for these countries is not available. Consumption has been estimated by TDA by aggregating the EXPORTS of the major wine producing countries to each individual country. The aggregation includes 40 countries including the EU 27, Argentina, Australia, Canada, China, Chile, Hong Kong, New Zealand, Singapore, South Africa, South Korea, Ukraine, United States and Uruguay.

(3) "0.0%" indicates less than .1%.

(4) Does not include yellow wine consumption of 1.043 billion liters in 2009; 1.324 billion liters in 2010; 1.591 billion liters in 2011 and 1.914 billion liters in 2012.

(5) Does not include sake consumption of 684 million liters in 2009; 672 million liters in 2010; 663 million liters in 2011 and 654 million liters in 2012.

(6) Does not include domestic rice wine and fruit wine consumption of 897 billion liters in 2009; 884 million liters in 2011; 885,000 in 2011 and 887 million liters in 2012.

(7) See Appendix 5: "US Wine Consumption 2009-2012".

(8) Consumption includes significant quantities of domestically produced wine that is derived from fruits other than grapes.
