- (1) Table 7 indicated population, wine consumption and per capita wine consumption in 225 countries. The source for population data is the World Bank Group (WBG). The WBG data is based on reports from the United Nations World Population Prospects, United Nations Population and Vital Statistics, Eurostat Demographic Statistics, The Pacific Community Program and the United States Census Bureau. The WBG population data refers to mid-year population in 2014. The wine consumption data refers to calendar year 2014. The November 2015 revision pertains to Sweden, Democratic Republic of Congo and Republic of Congo.
- (2) Wine consumption in 222 countries listed in tables 6.1 and 6.2.
- (3) WBG indicates that total world population in 2014 was 7,125,096,700. The "other population" data represent the difference between total "world total population" and "listed country" population. There is no apparent wine consumption in the "Other Population" category.
